ALERT ON THE BAGRÉ DAM SPILLAGE

The National Disaster Management Organization NADMO North East Regional Office, wishes to inform the general public, particularly residents living along the banks of the White Volta River and other vulnerable waterways, that the **SONABEL Authorities in Burkina Faso** have issued a new alert to spill the Bagré Dam on **Friday, 28th August 2026**.

The earlier planned spillage was suspended following a reduction in the water level of the dam. However, the authorities have now informed NADMO that the water level has risen unexpectedly, necessitating the release of water from the Bagré Dam.

NADMO is therefore warning all residents and communities along the riverbanks and other areas likely to be affected to evacuate with immediate effect and remain vigilant.

The public is encouraged to follow subsequent updates and information from NADMO and other relevant authorities.
